

REMARKS

The specification is being amended to recite as the second paragraph of page 1 that this application is a divisional of application serial number 09/947,088 which has issued as U.S. patent 6,832,031 B2.

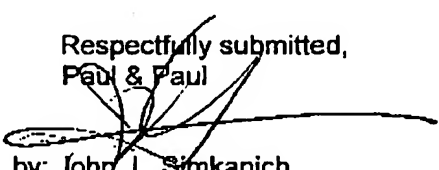

Applicant acknowledges the telephone conferences with the Examiner on April 28, and 29 and May 2, 2005. The Examiner has issued a telephone restriction between claims 17, 29-31, on one hand, and claim 32 on the other hand, and has requested a timely response so that the case maybe further examined. Applicant has elected claim 32 with restriction.

Claims 17, 29-31 have been withdrawn with Applicant's reservation of his right to either reinsert these withdrawn claims into this application, once a generic claim is determined allowable, or to file a divisional application to the withdraw claims 17, 29-31.

Applicant has added new claims 33 - 37 which are dependent from claim 32. Independent claim 32 and dependent claims 33 - 37 recite a single invention.
